### ABOUT ME

Experienced Hardware Developer with a demonstrated history of working in the Healthcare and Cleanroom industry.

Skilled in PCB Designing, Microcontrollers, Electrical CAD, Electrical Panels, Design Review alongside Linux System Administration, DevOps and Networking.

My seven years of practical experience in software, hardware and IoT solutions for both academic and commercial uses are summarized in this CV.

If you are looking for a dedicated Embedded System Developer with a great technical background, exceptional problem-solving skills and a collaborative mindset, please don't hesitate to connect with me.

### WORK EXPERIENCE

Embedded System Design Specialist Feb 2021 - Present

[C1Tech Group](#)

- Lead in the design, development, and implementation of the Operating Room and Cleanroom electrical systems.
- Seasoned manager of multiple teams at various places across the country

Hardware Development Manager - Vice Chairman Aug 2021 - Present

[FUMP-ICT](#)

- PCB Design, DC Circuit Design, Firmware Development (C/C++), Embedded Linux and Troubleshooting

Product Manager & DevOps Engineer Apr 2020 - Feb 2021

[Department of Education \(Khorasan Razavi, Iran\)](#)

- Linux System Administrator, Monitoring (SRE), C# (ASP.Net)

Teaching Assistant Sep 2017 - May 2020

Ferdowsi University of Mashhad

Assistant of Computer Foundation and Programming ([Dr.Asadi](#)), Computer Networking ([Dr.Mohajerzadeh](#)), Network Security ([Dr.Ghaemi](#)), and Wireless Networks ([Dr.Hosseini](#))

Lecturer of Internet of Things Basics Course (with [Dr.Sedaghat](#))

- Designing projects and assignments for students
- Providing support for helping students in their issues
- Scoring and marking assignments

Internship - Network Technician Jun 2018 - Aug 2018

[HiWeb \(Vodafone Iran Partner\)](#)

- 3G/4G network driver test using TEMS™ Network Testing Portfolio
- Network monitoring using Zabbix
- Several tasks of passive network engineer
- Worked with Mikrotik RouterOS

### EDUCATIONAL EXPERIENCE

Embedded System Developer - Development of Cryptocurrency Mining Rig Energy Monitoring System Jan 2020 - Dec 2020

[FUM IP-PBX Lab](#)

Software Programming: C# (ASP.Net Core API Based) with PostgreSQL Database

Board Design: 2-Layer PCB

Board Specs: ESP32 Core, Current & Voltage Measurement, ADC, AC to DC, RTC, EEPROM, Relay

Based on: Blynk IoT Platform (On-premises)

### Educations

- Master of Science, 2021-2023  
IAUM, Computer Networks  
Master's thesis: Design & Evaluation of a Tightly Coupled UWB/INS/GIS Indoor Positioning System Applying Machine Learning Methods in CloudIoT.  
GPA: 19.50/20
- Bachelor of Science, 2015-2020  
FUM, Computer System Architecture  
Bachelor project: Development of Cryptocurrency Mining Rig Energy Monitoring System.  
Major GPA: 18.05/20  
Overall GPA: 16.39/20
- Diploma, 2011-2015  
Allameh Tabataba'i, Mashhad  
Mathematics and Physics  
GPA: 19.76/20

### Certifications

- Building Automation using KNX Protocol - Feb 2018  
from "Iran Technical & Vocational Training"
- PCB Designing - Dec 2017  
from "College of Ferdowsi University of Mashhad"
- GNU/Linux Foundation - Apr 2017  
from "FUM LUG Association"

### Key Skills

- Excellent leadership, communication and time management abilities
- Strong cooperation and partnership skills in job environment
- Outstanding planning and multi-tasking abilities
- Proven ability to work creatively along with problem-solving skills
- Talented to acquire new skills and develop team members
- Adaptable, diligent and capable of working autonomously when necessary
- Remarkable to make choices in difficult situations

<b>Embedded System Developer - Operating Room UVC Disinfection System</b> <b>FUM Robotics Lab</b> Embedded Board: NodeMcu, UVC Lamps Power Circuit, AC to DC Converter Based on: Blynk IoT Platform (On-premises)	May 2020 - Apr 2020
<b>Designing and Optimizing of Campus LoRaWAN &amp; Wi-Fi Networks</b> <b>FUM Information &amp; Communication Center</b> <ul style="list-style-type: none"> <li>Tools: Ekahau Site Survey, GNS3, iPerf, Chirpstack</li> <li>Board Design: 2-Layer PCB</li> <li>Board Specs: ESP32 Core, RN2483, RFM95</li> </ul>	Jun 2019 - Feb 2020
<b>Executive Committee of the 16th International ISC</b> <b>Ferdowsi University of Mashhad</b> <ul style="list-style-type: none"> <li>Information Security and Cryptology Conference</li> <li>Speaker at Information Security and Cryptology Village</li> </ul>	Aug 2019 - Aug 2019
<b>Lead Project Manager - IoT Hotel Managment System</b> <b>Ashian Startup - Co-Founder</b> System Administrator: Windows Server-based, QGIS Software Programming: ASP.Net Framework and Razor pages with Microsoft SQL Server Boards Specs: 2-Layer PCB with STM32L, Zigbee mesh, audio, touch-key, ultra-low power design	Jun 2017 - Jul 2019
<b>Embedded System Developer - IoT Gateway</b> <b>FUM IoT Lab</b> <ul style="list-style-type: none"> <li>Software Programming: C# (ASP.Net Core API Based)</li> <li>Database: Microsoft SQL Server</li> <li>Board Design: 2-Layer PCB</li> <li>Board Specs: STM32F7 Core, RTC, SD Card, USB, 2G, LoRa, Zigbee, Ethernet, Wi-Fi, CAN, nRF (C++)</li> </ul>	Jan 2019 - May 2019
<b>Embedded System Developer - IoT Call and SMS module</b> <b>IoT based Call and SMS module</b> <ul style="list-style-type: none"> <li>Embedded Boards: STM32F4 Discovery, NodeMcu, SIM800 (C++)</li> <li>Software Programming: HTML, CSS, JavaScript</li> </ul>	Oct 2018 - Feb 2019
<b>Application Developer - Monitoring of Burnt Chandelier Lights</b> <b>FUM Pattern Recognition Lab</b> <ul style="list-style-type: none"> <li>Device: Samsung Gear S3</li> <li>Platform: Tizen (C++)</li> </ul>	Jan 2016 - May 2017

## Skills

### Operating Systems

  
 Expert in Linux and Embedded Linux

### Programming Languages

  
 C/C++, C#, and Bash Scripting  
 (Most experienced)

### Printed Circuit Board

  
 Experienced in Altium Designer  
 Expert in PCB assembly (SMD & DIP)

### Microcontroller and SoC

  
 Experienced in ESP32 and STM32 and also  
 NVIDIA Jetson, Raspberry Pi, and Beagle Bone

### DevOps and SRE

  
 Experienced in Git, CI/CD, Containers  
 and Orchestration, Automation tools, Metrics,  
 Tracing, and Logging Systems

### Networking

  
 Experienced in computer network and security  
 IEEE Wi-Fi, Bluetooth, Zigbee, and LoRaWAN

### Web Developer

  
 Familiar with ASP.Net with HTML, CSS, JS  
 background
