ABOUT ME

Embedded System Specialist with established experience in the Industrial IoT and Healthcare Industry.

This CV is a summary of +5 years of my practical experience developing embedded software, hardware, and Internet of Things products and solutions for academic and business use.

I enjoy working in collaborative settings where ideas are discussed and personal experiences are shared. In my senior role, I have worked as a team leader, cooperating with others to achieve optimal results.

I was involved in the production of a variety of products, and I hope they expand swiftly and perhaps improve our quality of life.

My LinkedIn and online portfolio has further information about me. ([Click Here](#))

WORK EXPERIENCE

Senior Embedded System Developer

Feb 2021 - Present

C1Tech Group

- Design, Development, and Implementation of an AI-Based Control Panel for Operating Theatres in Hospitals and Cleanrooms with Modular Technology
- Ceiling & Surgical Lights, AHU with Laminar Air Flow, Voice Command, VoIP, Music, Paging, Room Temp/Humidity/Pressure, HEPA Filter, Isolated Power Panel Monitoring, etc.
- Overall, 84 operating rooms and 41 sections of cleanrooms are automated in various locations across the country.

Embedded System Consultant

Jul 2019 - Present

FUMP-ICT

- Consultancy and development in the design of embedded systems in Green Campus Project of Ferdowsi University of Mashhad on a part-time contract.
- Equipping Internet of Things (IoT) devices, based on the LoRaWAN network across the campus.
- Power & Water Metering, 2D & 3D Online GIS (Indoor Positioning), Plants Irrigation, Transportation Monitoring (Buses, Cars, and Bikes).

Linux System Administrator

Jan 2020 - Jul 2020

Ministry of Education - Mashhad

- Online Learning Management System (LMS) - Virtual Classroom Platform
- Deploy applications and services developed by the programming team to the private cloud (Docker)
- Maintain and develop CI/CD pipelines (GitLab) and automated processes.
- Reliability and Performance Monitoring: Servers, Website, Database, Storage.

Embedded System Developer

Jan 2016 - Dec 2019

Ferdowsi University of Mashhad

- Incorporating student initiatives and various projects in university labs as part-time job.
- Described in EDUCATIONAL EXPERIENCE section (Page 2).

Lecturer & Teaching Assistant

Sep 2017 - May 2020

Ferdowsi University of Mashhad

- Lecturer & Teaching Assistant besides collaborating in university laboratories.
- Lecturer of Internet of Things Basics (with [Dr.Sedaghat](#))
- Teaching Assistant of Computer Foundation and Programming ([Dr.Asadi](#)), Computer Networking ([Dr.Mohajerzadeh](#)), Network Security ([Dr.Ghaemi](#)), and Wireless Networks ([Dr.Hosseini](#))

Internship - ICT Network Technician

Jun 2018 - Aug 2018

HiWeb (Vodafone Partner in Iran)

- Router Switch Configuration
- 3G/4G network driver test using TEMS™ Network Testing Portfolio
- Network monitoring using Zabbix
- Several tasks of passive network engineer

Educations

• Master of Science, 2021 - Present

IAUM, Computer Networks

GPA: 19.36/20

Master's thesis:

Design & Evaluation of a Tightly Coupled UWB/INS/GIS Indoor Positioning System
Applying Machine Learning Methods in CloudIoT.

• Bachelor of Science, 2015 - 2020

FUM, Computer System Architecture

GPA: 16.39/20

Bachelor's project:

Development of Cryptocurrency Mining Rig
Energy Monitoring System.

• Diploma, 2011 - 2014

ATM, Mathematics and Physics

GPA: 19.76/20

Skills

Operating Systems

Linux, Yocto, Buildroot, and RTOS

Familiar with U-Boot, and EDK II

Programming Languages

Experienced in C/C++, C#, Bash Scripting

Familiar With Python, and Qt

Printed Circuit Board (PCB)

Altium Designer, SPICE, DC Circuits

Expert in PCBA (Soldering) & Prototyping

Guidelines

Scrum, DfX, DFM, DFA, DFT, EMC/EMI/ESD

MCU, SBC, and SoC

STM32 and ESP32 MCUs, NVIDIA Jetson, Raspberry Pi, and Beagle Bone SBCs

Wireless Communications

Wi-Fi, Bluetooth, Zigbee, UWB, LoRaWAN, and Mesh Networking

Wired Communications

Ethernet, USB, GPIO, UART, SPI, I2C, I2S, ...
RS232, RS485, KNX, CAN, Modbus, ...

DevOps

Experienced in Git, Docker, L7 Servers, ...
Familiar with CI/CD, Grafana, Prometheus

EDUCATIONAL EXPERIENCE

Embedded System Developer - Development of Cryptocurrency Mining Rig Energy Monitoring System Jul 2020 - Dec 2020

FUM IP-PBX Lab

- Project of Bachelor's Degree
- This system comprises electric energy meter and website that shows data and statistics of energy consumption during cryptocurrency mining.
- Another version of this system is created to control home appliances power consumption using Wi-Fi mesh network.

Embedded System Developer - Operating Room UVC Disinfection System Jan 2020 - Jan 2020

FUM Robotics Lab

- This robot was created to clean hospital areas using high-power 360-degree UVC lights.
- The robot's microprocessor, determines the duration of the UVC radiation based on the size of the room.

Designing and Optimizing of FUM Campus Wi-Fi Network Jul 2019 - Dec 2019

FUM Information & Communication Technology Center (ICT)

- The FUM ICT Center launched this initiative in response to the numerous issues with the high-density Wi-Fi network that have been observed, including network bandwidth issues, signal collection issues, and a lack of coverage.
- This project's primary tasks were designing network CAD plan, access point relocation, network settings adjustment, and site surveys.

Executive Committee

Aug 2019 - Aug 2019

Ferdowsi University of Mashhad

- 16th International Information Security and Cryptology Conference
- Speaker at Information Security and Cryptology Village

Embedded System Developer - IoT Gateway

May 2019 - Jul 2019

FUM IoT Lab

- All-in-One Gateway, which allows for a variety of interactions between the nodes and the server. Users, preferences, network nodes, and ultimately data transmitted over networks are all managed on the device's control page.
- Specifications: STM32F7, GSM, Wi-Fi, Ethernet, Bluetooth, Zigbee, LoRa, RF, and SD Card

Embedded System Developer - IoT Call and SMS module

Oct 2018 - May 2019

IoT based Call and SMS module

- This device call a phone number and send individual or group text messages.
- The system contains hardware circuits and admin panel (website) for SMS scheduling and auto calling and also message planner. It has the ability to save user contacts to the internal flash memory.

Embedded System Developer - IoT Hotel Management System Jun 2017 - Aug 2018

Co-Founder at Ashian Startup

- This startup's major objectives are a fully IoT-based hotel administration system and improved accommodations for its visitors.
- Guests can submit requests to the hotel desk, order goods, request cleaning, control lights, and more using the interior panels.

Smart Watch Application Developer - Monitoring of Burnt Chandelier Lights

Jan 2016 - May 2017

FUM Pattern Recognition Lab

- The goal of this endeavor is to locate any burned-out lights inside the fixtures.
- The core of this system is to measure how much total current is being used and send that data to the operator's wristwatch and finally the watch collects data and send it to the website.

Languages

English

German

Persian

Certifications

- Building Automation using KNX Protocol - Feb 2018 from "Iran Technical & Vocational Training"
- PCB Designing - Dec 2017 from "Ferdowsi University of Mashhad College"
- GNU/Linux Foundation - Apr 2017 from "Ferdowsi University of Mashhad Linux User Group Association"

Soft Skills

- Excellent leadership, communication and time management abilities
- Strong cooperation and partnership skills in job environment
- Outstanding planning and multi-tasking abilities
- Proven ability to work creatively along with problem-solving skills
- Talented to acquire new skills and develop team members
- Adaptable, diligent and capable of working autonomously when necessary
- Remarkable to make choices in difficult situations
